Welcome to the NorthBank Cloud Platform Team. Mission orientation and onboarding dossier enclosed.

NotebookLM

Operational Context and Current Status

Entity:

A mid-sized retail bank

Scale:

4 Million Active Customers

Migration Phase:

18 Months in (Service by Service)

Uptime:

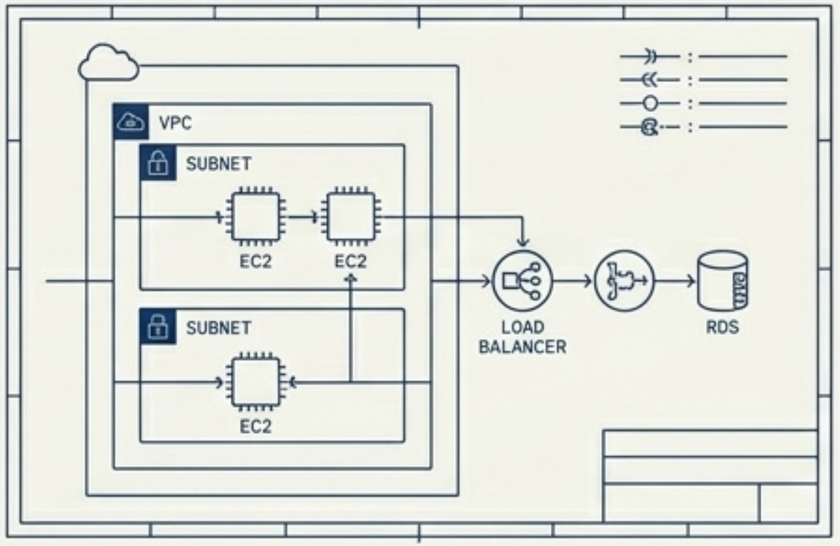

ZERO Outages

You are joining the Cloud Platform team today. Our primary directive is to maintain the zero-outage streak.

NotebookLM

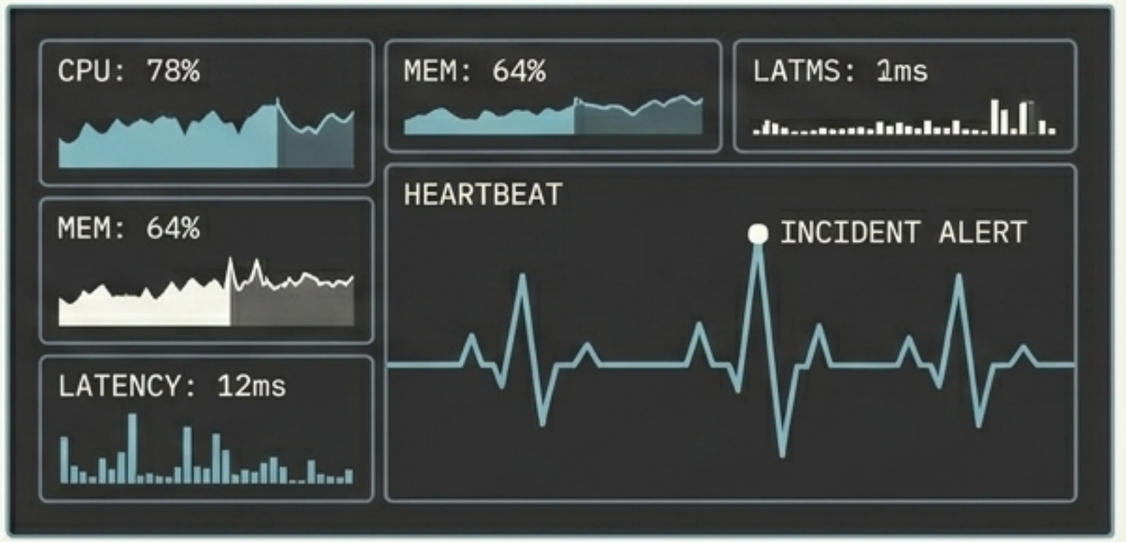

The Paradigm Shift: Architecting vs Operating

Day 1

Building something for the very first time. Greenfield deployments, theoretical architecture, and initial provisioning.

Day 2

Keeping it running and fixing what breaks. Brownfield environments, incident response, maintenance, and optimisation.

This course abandons the blueprints to teach Day 2 — the reality of the job.

NotebookLM

Team Composition and Value Alignment

The Fresher

Objective:
Experience exactly what day one on a real cloud ops team feels like.

Value:
Escape tutorial purgatory and safely operate in a production-grade environment.

The 10-Year Veteran

Objective:
Review the optimal operating model, formally documented and written down.

Value:
Validate existing knowledge, refine instincts, and standardise operational habits.

NotebookLM

The Two Pillars of Day 2 Mastery

The Human Side

How the job actually works day to day. Communication, operational rhythms, and team dynamics.

The Technical Side

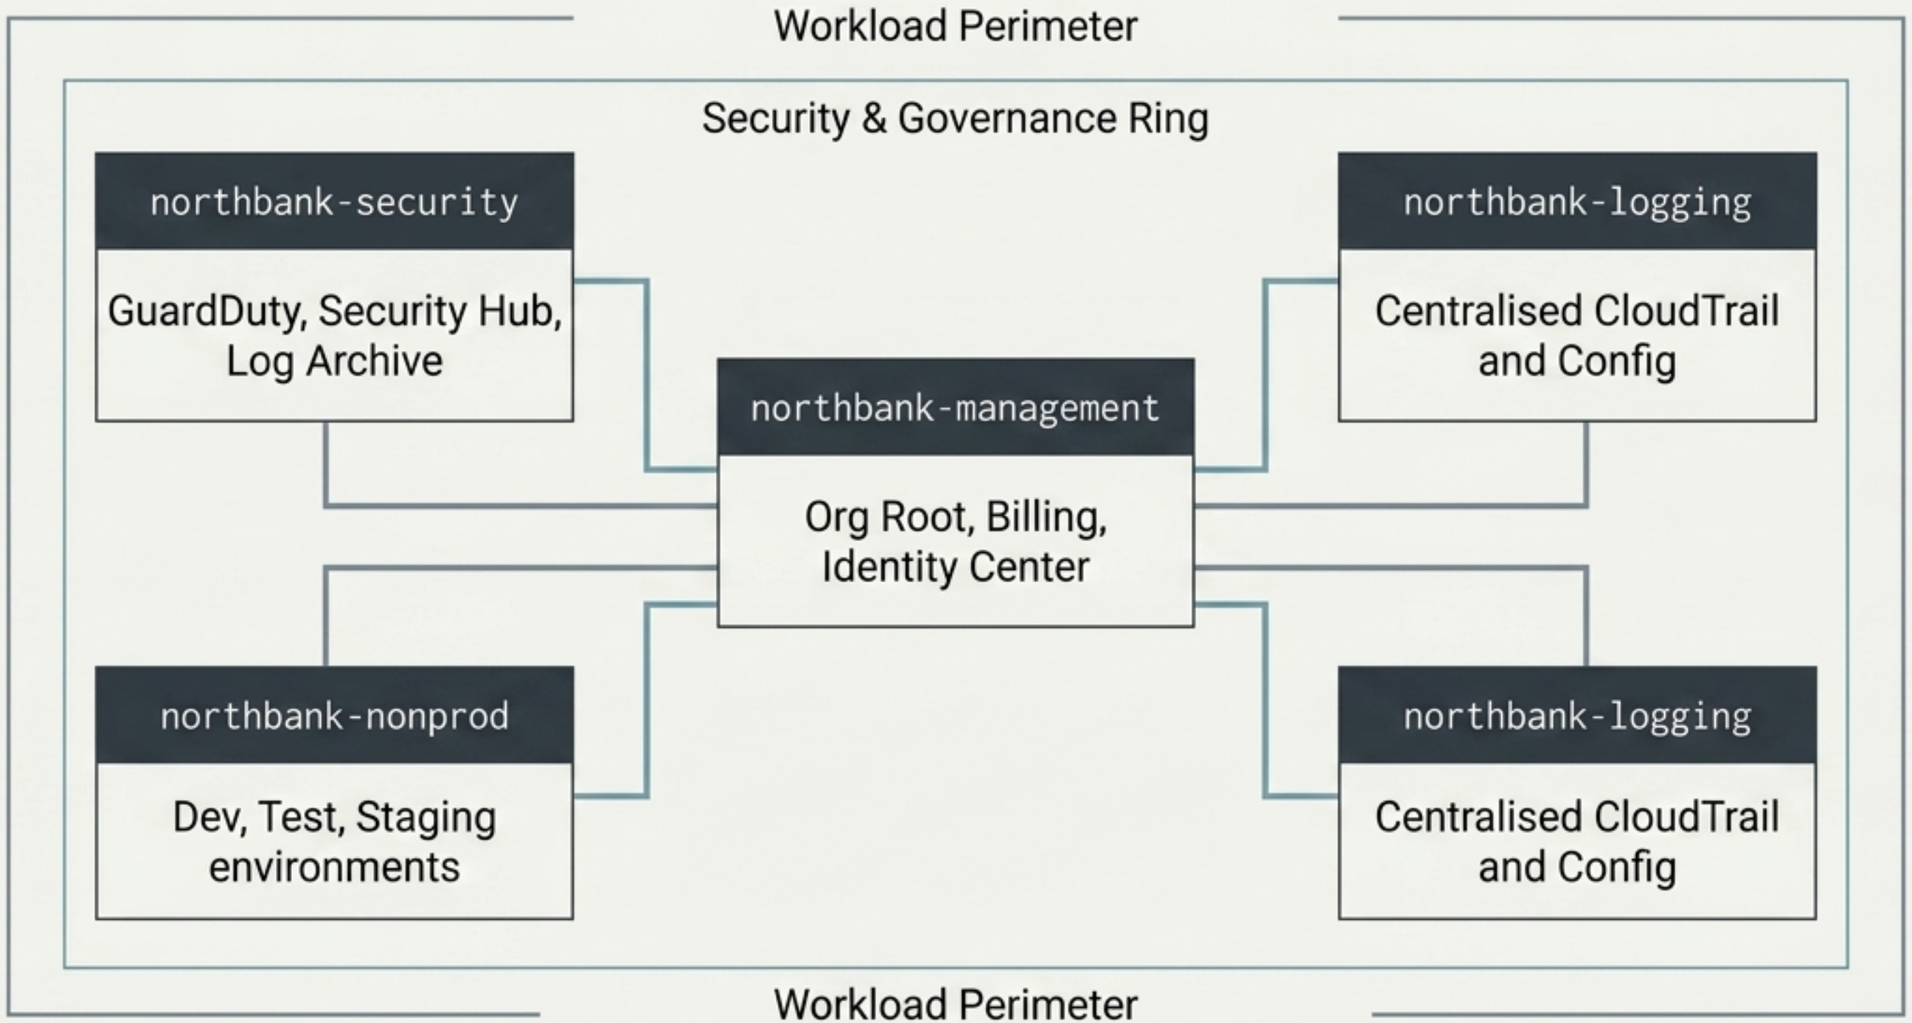

15 hands-on, high-fidelity troubleshooting labs to diagnose and fix breakages.

Day 2 Mastery

Where deep technical triage meets flawless operational process.

NotebookLM

The Playing Field: Multi-Account Topology

NotebookLM

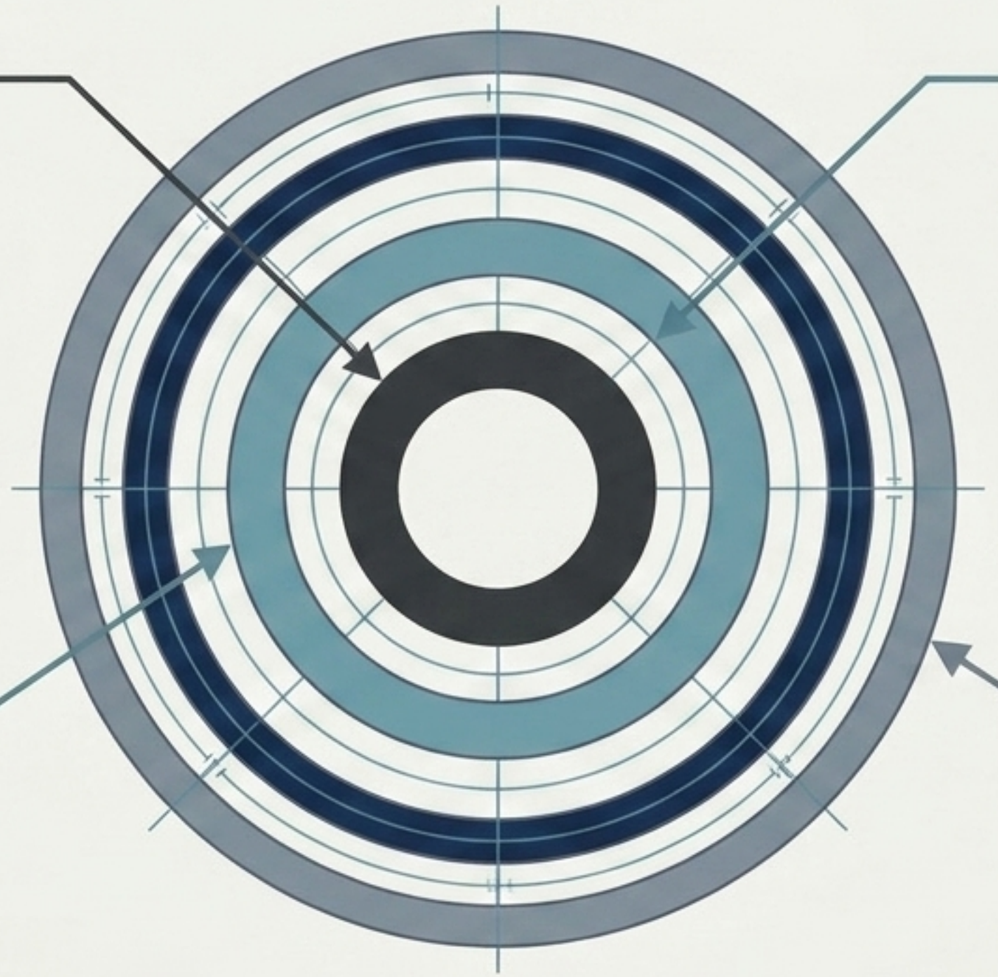

The Rhythm of Cloud Operations

Daily

Triage, alerts, and immediate incident response.

Weekly

Patching, minor updates, and sprint reviews.

Monthly

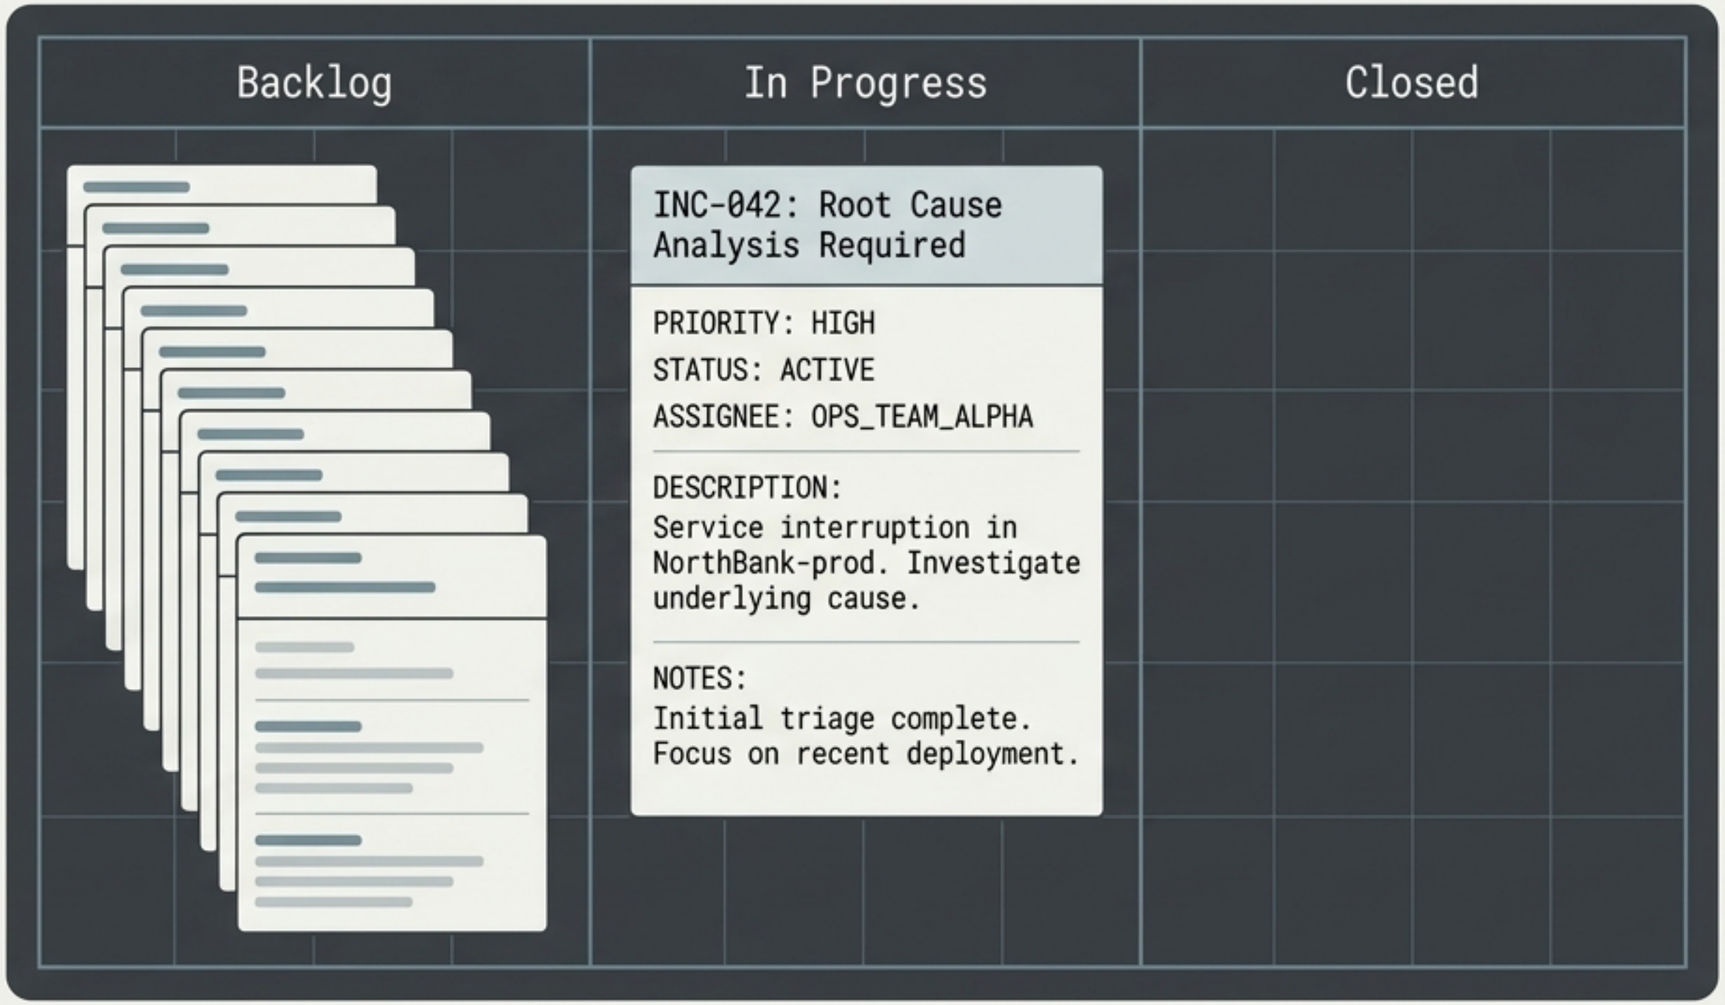

Cost optimisation reviews, access audits, and architectural refinements.

Quarterly

Major migrations, disaster recovery drills, and strategic planning.

NotebookLM

The Engagement Model: Incident Management

- Every lab in this course is a course is a NorthBank ticket.
- You will be assigned the 15 most common incidents that occur in enterprise cloud environments.
- Your mandate: Diagnose the root cause, implement the technical fix, and close the ticket without impacting the 4 million active customers.

NotebookLM

Mission Outcomes and Required Habits

 Enterprise Access Control	Logging in the way real companies do via SSO and scoped roles.
 Operational Cadence	Complete mastery of the daily, weekly, monthly, and quarterly rhythm.
 The Resolution Playbook	The proven ability to diagnose and fix the 15 most common cloud incidents.
 The Triage-Spine Habit	Supported by your new one-page diagnostic cheat sheet.

> End of Briefing. Proceed to initial authentication.
