The NorthBank Sandbox_

Building the Practice Environment

AWS Day 2 Operations & Troubleshooting

NotebookLM

Blast Radius Diagram

Annotated Component Matrix

base-network

Role:	The Foundation
Components:	VPC, subnets, routing, security groups
Lab Status:	**Stable / Untouched**

web-app

Role:	The Application Tier
Components:	ALB, Auto Scaling group, optional RDS
Lab Status:	**Target for Breaking** *Most labs break something inside web-app*

NotebookLM

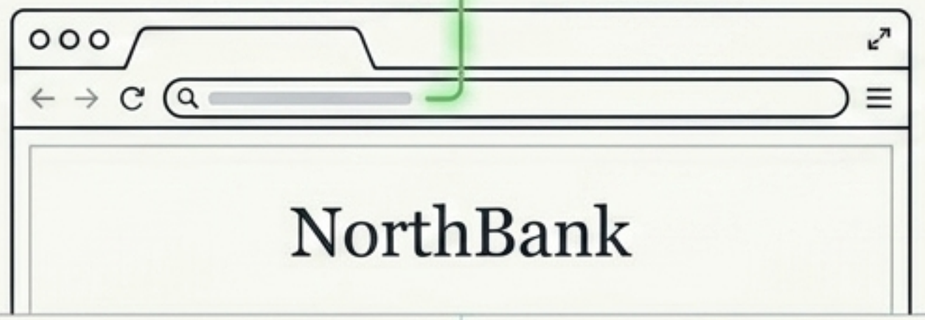

```
> terraform init
> terraform apply
```

~3-5 min execution

Infrastructure Provisioned:

VPC | ALB | ASG | NAT Gateway

```
> terraform output
app_url
asg_name
```

Open `app_url` to verify the NorthBank page is live.

NotebookLM

Global Compute

Smallest instance sizes applied throughout the environment.

Data Tier Status

RDS is **OFF** by default.

Only enabled manually during Labs 9, 11, and 15.

Billing Guardrail

Set an AWS budget alarm before starting any operations.

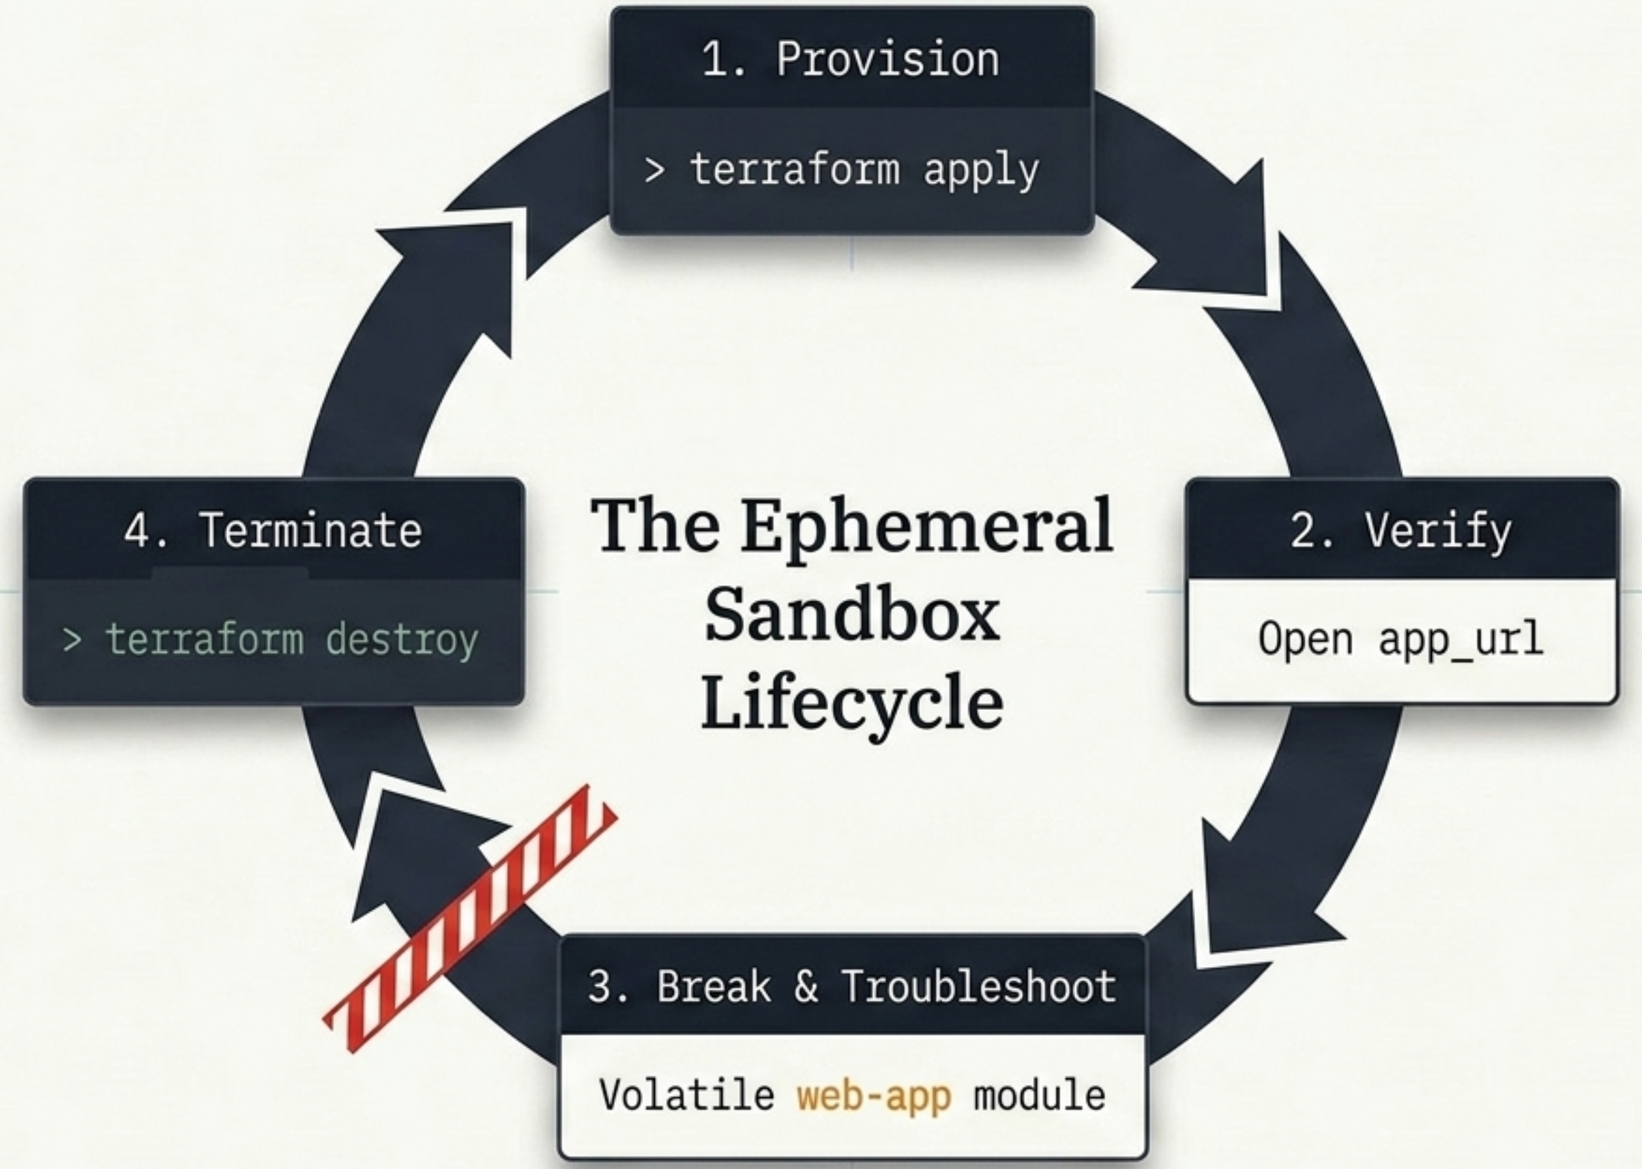

Session Teardown

Strictly required at the end of every session.

```
> terraform destroy
```
